Sarnafil Inc. and Roofscapes, Inc. Offer Single Source Green Roof System Warranty

Canton, MA, August 17, 2006 – Sarnafil Inc., a leading manufacturer of thermoplastic roofing and waterproofing systems and Roofscapes, Inc. a preeminent full-service green roof firm, announce a single source Sarnafil system warranty agreement for extensive green roof systems. Under the terms of the agreement, the companies agree to jointly promote green roofs and to offer a single source Sarnafil warranty.

“We are pleased to be the industries’ first single-ply roofing manufacturer to offer a single source green roof warranty,” said Brian Whelan, president and CEO of Sarnafil Inc. “This agreement brings together two of the best companies in the green roofing market with a combined green roofing experience of more than 40 years.”

Green roofs consist of a planted area on a roof surface. They offer numerous benefits to the building owner and the environment including, reduced building heating and cooling costs, protection of the waterproofing membrane, improved air quality, storm water retention, reduction in the urban heat island effect and aesthetic appeal.

“The Sarnafil – Roofscapes, Inc. agreement offers a breakthrough for the architect and building owner,” said Charlie Miller, president of Roofscapes, Inc. “Green roof systems require specialized design and installation expertise. It is imperative that the waterproofing system design and materials be of the highest quality to avoid costly and difficult repairs in the future. Likewise, the growing medium and vegetated cover design and maintenance are critical to the vitality of the roofing system. Now building owners can have the peace-of-mind of working with the industries’ most experienced green roof team and get a single

source warranty covering the entire system.”

The team of Sarnafil and Roofscapes, Inc. utilizes time-tested design principals while customizing each installation to satisfy the unique demands of regional climates and conditions.

Sarnafil and Roofscapes, Inc. encourage a design-build relationship with the owner and designer to address all issues involving the waterproofing design, plant selection, water management and conservation, maintenance requirements, and system weight in an effort to tailor the vegetated roof to climatic constraints and the client’s needs.

About Sarnafil Inc.

Sarnafil Inc. is an international manufacturer of high-quality thermoplastic membranes for a wide range of applications including roofing, waterproofing, and civil engineering. Since 1964, Sarnafil has manufactured close to 4 billion sq. ft. of thermoplastic roofing and waterproofing membrane in Switzerland, China, and Canton, Mass. Sarnafil roofing and waterproofing systems protect some of the world’s most valuable structures and treasures, including schools and universities, libraries, museums, hospitals, commercial and government buildings, and Olympic stadiums. For more information about Sarnafil in the U.S., visit www.sarnafilus.com.

About Roofscapes, Inc.

Roofscapes, Inc. is a green roof engineering, design and installation firm with expertise in civil engineering, roof gardening, roofing and waterproofing. Years of research and practice have established Roofscapes, Inc. as one of the most highly regarded green roof knowledge bases in the country. The company fundamentally understands the constellation of roofing, engineering, horticultural, hydrologic and thermodynamic issues that contribute to the long-term viability and success of any green roof.
